

# WasteTrack

is an integrated technology platform developed and hosted by 3Logix, here in Australia and New Zealand for the Environmental Services sector.

## Photographic Evidence

Capture proof of service, including contamination, to process service enquiries quickly and precisely.

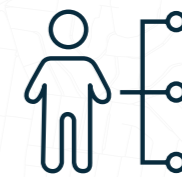

## Fully Integrated DVR

Video recording of accidents, proof of service, driver behaviour, and collection contamination.

## Run and Route Planning

Optimise services by planning runs and keeping workflow on track.

## Fatigue Management

Monitor, assist and enforce mandatory rest breaks.

## Real-time GPS Tracking

Industry leading second-by-second telematics, location and service reporting.

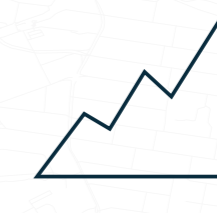

## Operations Intelligence

Gain insight into fleet operations through powerful management and analysis tools.

## Industrially Designed Vehicle Hardware

Robust hardware designed to endure the toughest of work days.

## KPI Collection and Statistics

Full visibility over all operations with the capability to run reports and extract statistics.
